WE GUIDE PEOPLE WITH DISABILITIES IN YOUR BUILDINGS

Disha Indoor Navigation is an inclusive wayfinding application that **guides people with or without disabilities through everyday complex places**. This app is designed to provide building owners and managers with a response to their challenges in terms of **accessibility, inclusion and visitor experience**.

✓ Step-by-step navigation

✓ Accessible interfaces

✓ Dynamic maps

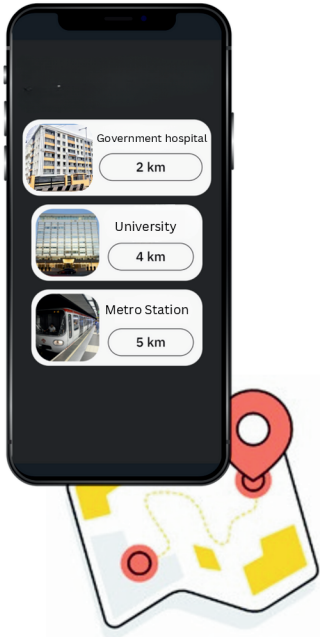

✓ Multilingual

✓ Free for the user
(iOS & Android)

✓ Easy-to-use administration
and management tool

✓ Remote support

✓ Anonymized user statistics

More than 1.3 billion people worldwide suffer from a disability.

People with disabilities have different mobility profiles. This diversity of uses means that users may feel excluded from places that have not been designed to be inclusive. Disha Indoor Navigation provides interfaces, itineraries and instructions adapted to each user profile. It enables visitors to find their way around better, and to locate points of interest and services offered by establishments.

So why not come up with an application that offers your disabled users (and everyone else) a much better experience?

Enhance the experience of your disabled users

Improve your social impact

Attract and retain visitors with disabilities

Reduce your assistance and accessibility costs
